

Combat Mission Shock Force - British Forces Overview

Monday, 10 November 2008

Last Updated Monday, 28 September 2009

Shock Force - British Forces is the second module in the contemporary warfare Combat Mission Shock Force family of games.

Britain fields one of the most powerful armed forces in the world today, which Combat Mission fans will soon experience for themselves. The full range of British weaponry is brought to life with the same amazing level of detail found in the previous Combat Mission titles.

Everything from the new version of the L85A2 rifle to the Challenger 2 with all the latest upgrades is included in order to give a full accounting of the capabilities of the modern British Army. Play with them on their own or as part of multi-national joint task forces using any of Shock Forces' other units. As with the Marines Module, all new scenarios and a campaign are included for exciting play right out of the box, before digging in and using the powerful editor or sharing scenarios with other Shock Force gamers. New voices (multiple accents), sound effects, and game features round out the game experience.

More information about how Modules work can be found in the "Knowledgebase" section on the left.

So what does the British Forces module include? Here is an overview of some of the included units, weapons and equipment. A more detailed overview can also be found under the "Equipment" section on the left.

Harrier GR9

The British Forces Module is packed with a lot of cool stuff and is available for purchase to you all right now. "All" means to anybody with a Battlefront, Paradox, and Gamer's Gate version of CM:SF. (In other words: it's not required to own the Marines module to enjoy the British Module, but you do need to have the base game of CM:SF. It doesn't matter which version you have, CMSF British Forces will work with all of them).
